

# Downloading Closed Captioned Digital Videos

When attempting to download closed captioned videos from United Streaming, there are two files that you will need to download – the actual video file and the closed caption file.

Here is an example of some video segments from United Streaming. Prior to downloading, set up a folder to hold both your video and the closed caption file. Click on the download icon 📄 to download the video. Click on the closed caption icon CC to download the closed caption file.

When using closed captioning, the text may not be as large as you would like it to be. To increase the size of the text, open the closed caption file in a text editing program like WordPad or Notepad. Locate the line of code that indicates “font size.” This is usually about the sixth line of code. Increase the font size to at least 20 pts, or even larger. Save and close your file in your folder with the video file. The next time you view the video, the size of the text should be increased.

Special thanks go out to Jeff Smith at the Erie County Technical School who came up with this helpful suggestion.
